West Feeds Dealer Standards

1. West Feeds requires dealers to purchase a minimum of seven (7) tons of various West Feeds products in a thirty day period. This may consist of any combination of our various product lines. Products must be ordered in lots of five (5) excluding specialty items.
2. All West Feeds dealers must operate from a legitimate store with storefront and store name and West Feeds sign prominently displayed on the front of the building at all times.
3. Drivers will not be responsible for rotating feed stored within the confines of your store. When you take delivery of feed it becomes yours. Therefore, it is your responsibility to move older feed out to make room for the new shipment.
4. When orders are placed they are not process until the next business day. For example orders placed Friday are not sent in for processing until Monday. Depending on the time of year, orders require two day manufacturing of products and this does not include the day the order is placed. Ingredients and peak feed season could delay manufacturing.
